Summary

For me, science is not just knowledge; it's a way of thinking. It's a journey that began in the heart of Egypt, a place where the whispers of ancient mysteries still echo through the sands of time. My name is Mohamed Yosef, and I stand at the intersection of two great passions: mathematics and computer science.

Experience

Data Scientist

MY101

Oct 2022 - Present (1 year 4 months)

Doing research on deep reinforcement learning as well as doing some freelance gigs on a side.

Research Fellow

Mansoura University

Sep 2023 - Present (5 months)

- Working on a research project called "AQSA" that aims to discover new deep learning techniques as well as help startups and local brands in Egypt.

Product Designer

MY101

Apr 2021 - Aug 2023 (2 years 5 months)

- Understand your customers and target market through user research to pinpoint their needs and problems.
- Map out the optimal user journey through intuitive wireframes and storyboards.
- Refine and iterate designs through high and low fidelity prototypes to maximize usability.
- Craft the final visual design that is not only functional but captures your brand's aesthetic and voice.

Education

Mansoura University

Bachelor's degree, Statistics and Computer Science

Skills

C++ • Data Science • User Experience Design (UED) • Statistical Data Analysis • Time Series Analysis
• Reinforcement Learning • Decision Sciences • Machine Learning • Deep Learning • Python
(Programming Language)
